

THE PROPERTY INCIDENT & LOSS RECORD KIT

Document it before you need to prove it.

When something happens to the property - storm, water, fire, failure, or damage of any kind - this kit keeps the factual record: what happened, when, what it looked like, what was done, what it cost.

INCIDENT RECORDS - 2026

How to Use This Kit

An incident is anything that damages or threatens the property: a storm, a burst pipe, a fallen tree, an appliance failure, damage during work on the home, a utility problem. Whatever it is, the facts of it fade fast - and the record you keep in the first days is the record you will have forever.

This kit works for any incident, whether or not an insurance claim, warranty request, or any other process ever follows. Its only job is the factual record: dates, photographs, actions, costs, conversations, documents.

START THE CHRONOLOGY THE DAY YOU NOTICE.

The first entry is the most valuable line in the whole record: what you saw, when, and what you did next.

PHOTOGRAPH BEFORE YOU TOUCH ANYTHING.

Then photograph again after any cleanup or protective step. Both states matter; only one of them is available later.

LOG EVERY CONVERSATION THE SAME DAY.

Who, when, how, and what was said - in your own words, dated. Memory is not a communications log.

READ THIS FIRST

This kit is a documentation and organization tool for your own records. It is not legal or insurance advice, does not interpret any policy or contract, does not determine coverage, fault, or liability, and does not tell you what any outcome should be. It preserves facts. Decisions about any claim, dispute, or repair belong with you and the licensed professionals you choose.

The Incident Record

One card per incident: what happened, when it was first noticed, where, and what was done immediately. Number each incident and carry the number onto every page that follows.

IN THIS SECTION

- Incident cards
- First-noticed facts
- Immediate actions taken

Incident Card 1

The Chronology

The running dated log of everything: what happened, what you observed, what you did, who was involved. The chronology is the backbone every other page hangs from.

IN THIS SECTION

- Dated running entries
- Observations vs. actions
- Reference to photos & documents

Chronology - Page 1

Damage Documentation

Area by area: what is damaged, what it looks like, and the photographs that show it. Describe what you can see and measure - the record speaks in observations.

IN THIS SECTION

- Per-area damage register
- Photo confirmation
- Measurements & counts

Damage Register - Page 1

Contents Affected

Personal property affected by the incident - item by item, with its condition described and photographed. If you keep Kit 1, note the inventory page each item appears on.

ITEM	INC #	CONDITION OBSERVED	PHOTOS	KIT 1 REF	DISPOSITION (KEPT/DI

Mitigation Record

The protective steps taken to keep things from getting worse - tarps, water extraction, board-ups, shutoffs - each one dated, photographed, and priced.

IN THIS SECTION

- Action log with dates
- Costs & receipts
- Before / after photo confirmation

Protective Actions - Page 1

Closing the Incident

When it's over, close the record deliberately: totals, final status, what the master property record needs to inherit, and what you'd document sooner next time.

IN THIS SECTION

- Incident close-out
- Master-record updates
- Notes to your future self

Incident Close-Out

INCIDENT 1 - CLOSED

CLOSED (DATE)	TOTAL OUT-OF-POCKET	TOTAL REPAIR COST
FINAL STATUS / RESOLUTION (FACTUAL)		
FULL FILE SCANNED & STORED AT		

INCIDENT 2 - CLOSED

CLOSED (DATE)	TOTAL OUT-OF-POCKET	TOTAL REPAIR COST
FINAL STATUS / RESOLUTION (FACTUAL)		
FULL FILE SCANNED & STORED AT		

Master property record updated

- ☐ Repairs copied to Kit 1 repair history
- ☐ New systems / items added to inventory & serial logs
- ☐ Warranty on repairs added to warranty tracker

Notes to Your Future Self

What you'd photograph sooner, log sooner, or keep differently next time. The best documentation habits come from the incident you just finished.

The First 48 Hours, In Order

If you open this kit mid-incident and read only one page, make it this one.

- 01 Make it safe for people first - property second, always.
- 02 Photograph everything as found, before touching anything.
- 03 Take reasonable protective steps; photograph after each one; keep every receipt.
- 04 Start the chronology: first entry today, in your own words.
- 05 Open an incident card and number it.
- 06 Log every conversation the day it happens.
- 07 Move the photos into a dated incident album tonight - and back them up off the property.

PLAIN-LANGUAGE NOTE

This kit is a documentation and organization tool for your own records. It is not legal or insurance advice, does not interpret policies or contracts, and does not determine coverage, fault, liability, or the outcome of any process. If an insurance claim or dispute follows your incident, the decisions in it are yours and your chosen licensed professionals'.

Document it before you need to prove it.
